Sign Manufacturing Day Munn Enterprises, Inc.

| | |
|---------------|--|
| WHAT? | Sign Manufacturing Day |
| WHEN? | Friday, October 5, 2018, 9 a.m. until noon |
| WHERE? | Munn Enterprises, Inc. (7712 U.S. 49, Hattiesburg, MS 39402) |

ABOUT SIGN MANUFACTURING DAY:

Sponsored by the International Sign Association, #SignMFGDay highlights the exciting and diverse sign manufacturing industry. Sign companies across the world will open their doors to encourage students to explore career opportunities within the industry. Community members and elected officials are also invited to see first-hand the value of manufacturing to the economy and to get a look at the various processes involved with sign manufacturing.

SCHEDULE OF EVENTS:

- 9 a.m. – The day will begin with light refreshments, a warm welcome from the Munn family and company leaders, and the showing of a 6-minute video about Munn Enterprises.
- 9:30 to 10:30 a.m. – Our 70,000-square-foot plant will be open for tours and departmental personnel will discuss their role in the process. *Because of the nature of our work, safety glasses and other protective equipment will be furnished and are required while touring the plant floor and outer buildings.*
- 10:30 a.m. – There will be an open Q&A session about our industry.
- 11 a.m. – Lunch will be served and guests will mingle with our team.

ABOUT MUNN ENTERPRISES:

Twenty-seven years of experience in outdoor advertising and a belief in quality craftsmanship and top-notch customer service prompted Everette Munn, with the help of his sons Harold and Howard, to establish Munn Enterprises in 1981. A reputation for quality visual products, including signs, awnings, and canopies, and an outstanding service focus have led a strong pattern of growth with both local and national accounts across the southeastern United States. The company's operation, based in Hattiesburg, Mississippi, has evolved from a 1,200-square-foot fabrication shop and one truck and trailer to a 70,000-square-foot manufacturing plant with more than 70 employees. An installation and service network allows the company to operate outside of its direct footprint throughout the country. The latest and most advanced techniques and materials, crafted and installed by the most experienced and professional personnel in the industry, guarantee bold, long-lasting visuals.

THE BENEFITS OF SIGN MANUFACTURING DAY:

- FOR EDUCATORS AND STUDENTS – Link the classroom to the real world! See how careers in welding, design, precision machining, CAD, and so many others are put to use in our vibrant industry.
- FOR THE PUBLIC – See the "behind the scenes" of our trade!
